Rest and recovery

Minor rest: one hour of rest, recover Fatigue, extinguish all light sources lit before the rest began.

Major rest: make camp, extinguish all light sources lit before the rest began, eat one unit of food (optional), rest for six to ten hours, recover Fatigue and Burn, recover injuries if food was eaten, extinguish all light sources lit during the rest.

Injury recovery: three separate injuries each heal by 1. Pre-recovery critical injuries count as two choices.

Spells

Can hold up to (Sorcery skill level) spell slots in memory. The rest must be stored in spellbooks. Put "Storage: Mem" for spells in memory, and "Storage: <name>" on spells in books. Give each book a memorable name.

First aid and medical care

First aid and medical care both reduce an injury's value by 1.

First aid: Lore or Survival, TN 8/10 + half the injury value, takes 15 minutes, must be done within one hour of injury, can only be attempted once per injury (even if unsuccessful).

Medical care: Lore TN 8/10 + half the injury value, takes 30 minutes, each character can only receive one medical care roll per day, regardless of how many injuries they have or if the roll fails.
